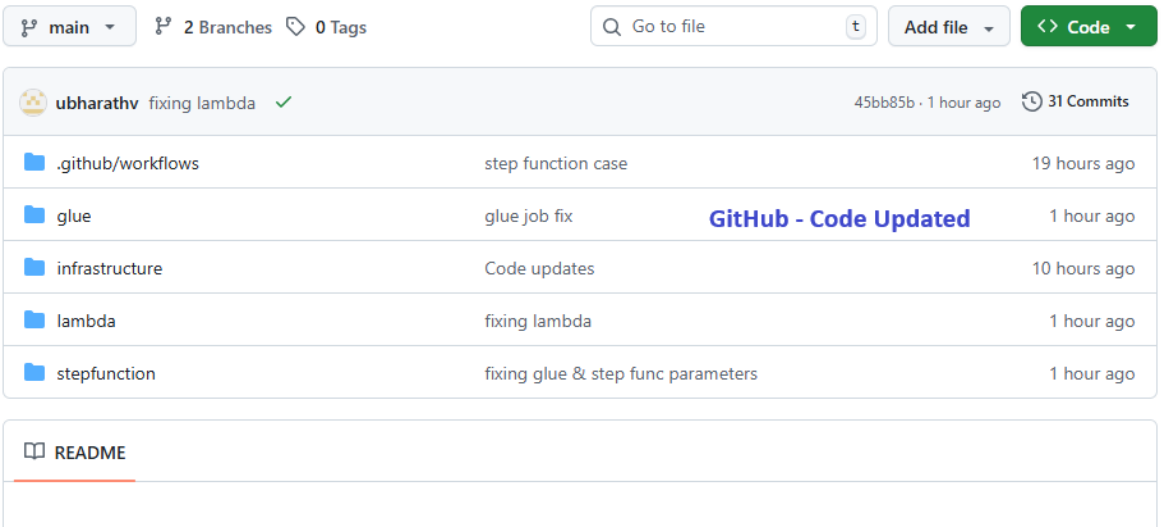
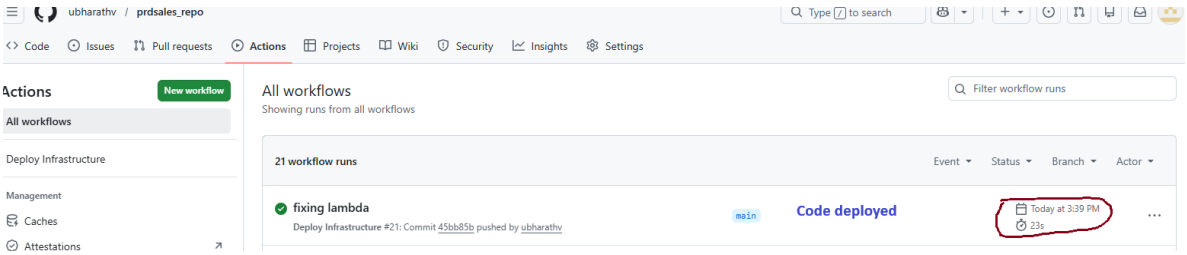
Testing snapshots for reference

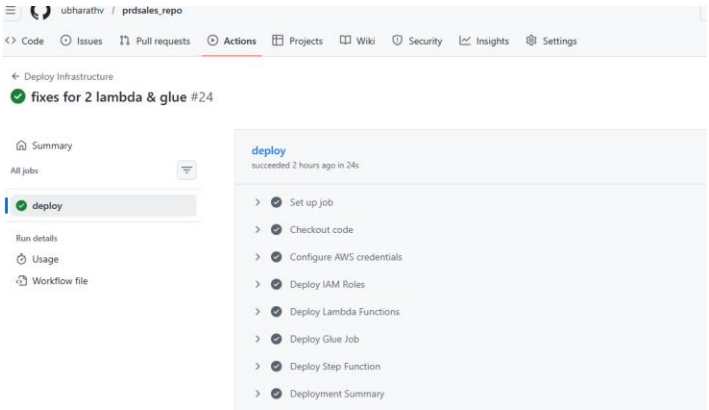
Step 1 - GitHub code updated-

https://github.com/ubharathv/prdsales_repo



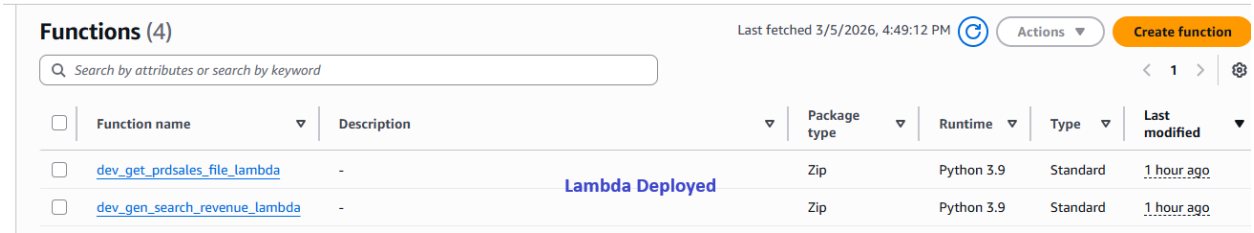
Step 2 - GitHub – deployment successful



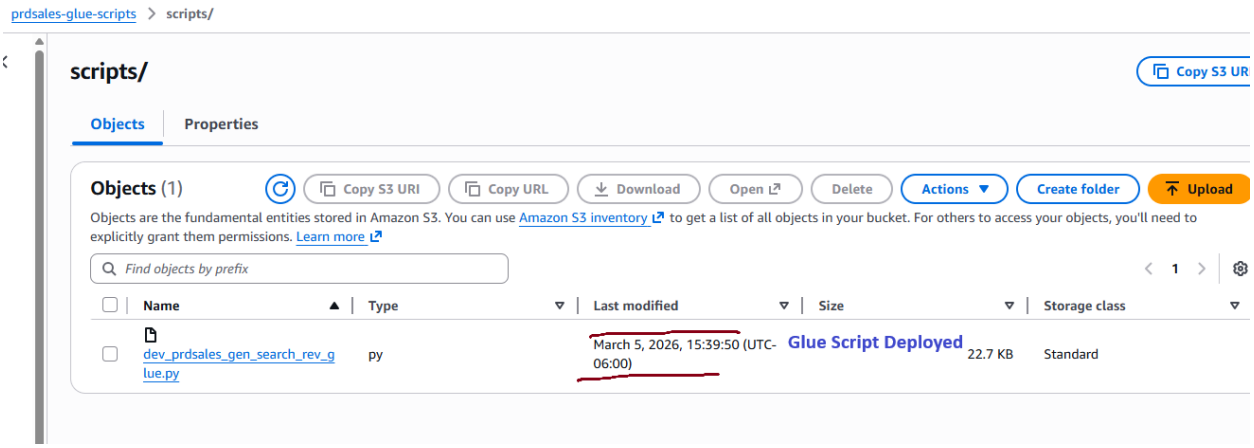


GitHub - One more as reference

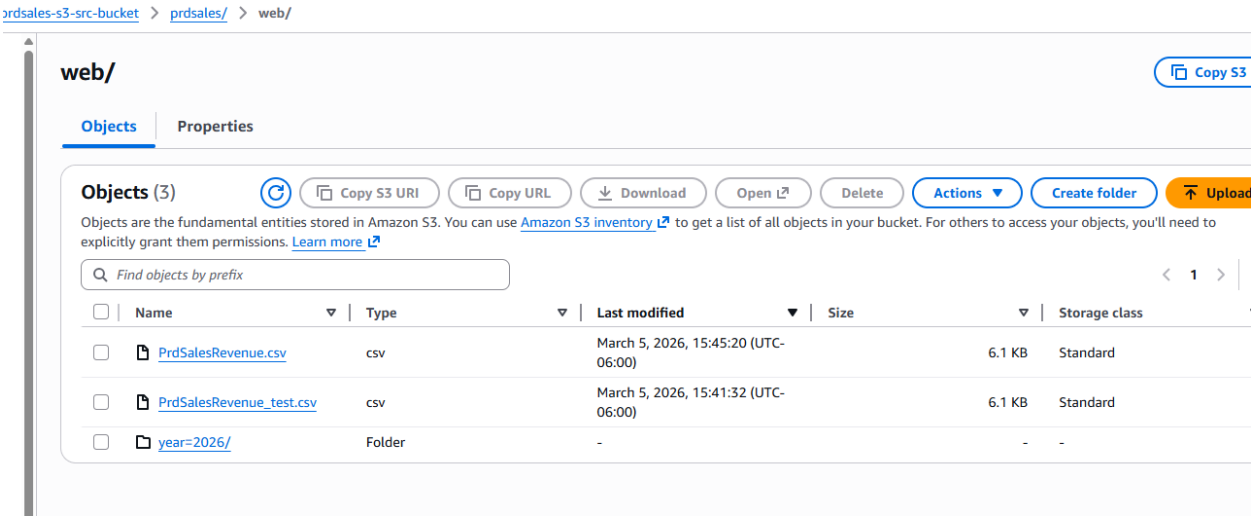
Step 3 - Lambda Deployed in AWS

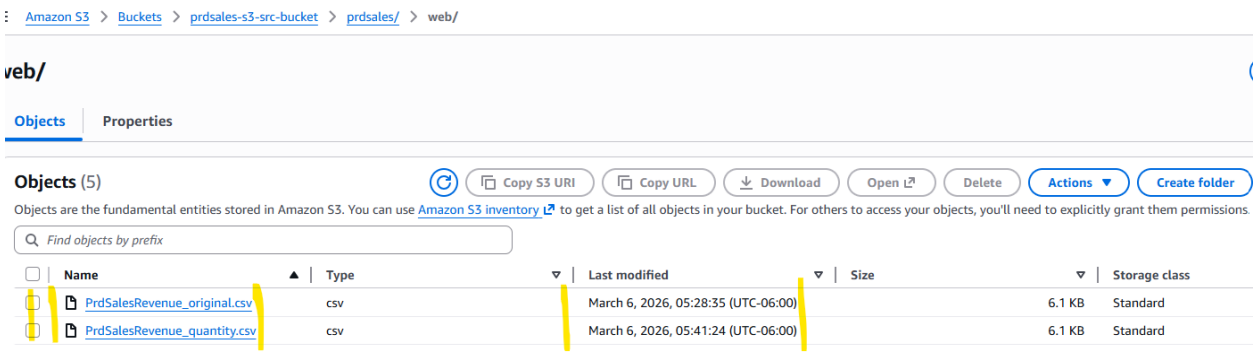


Step 4 - Glue Script – Deployed

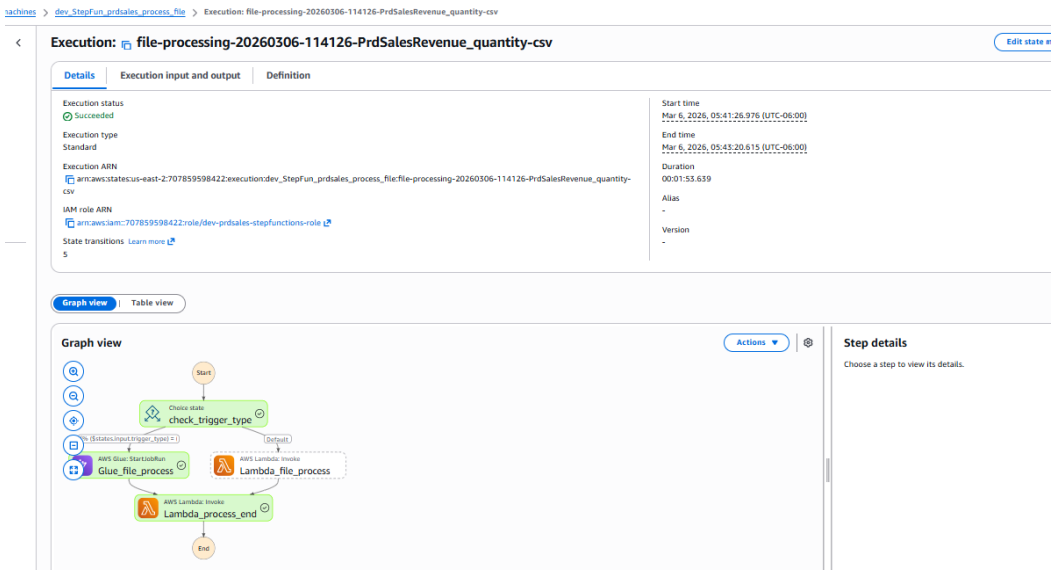


Step 5 - Source File Placed:

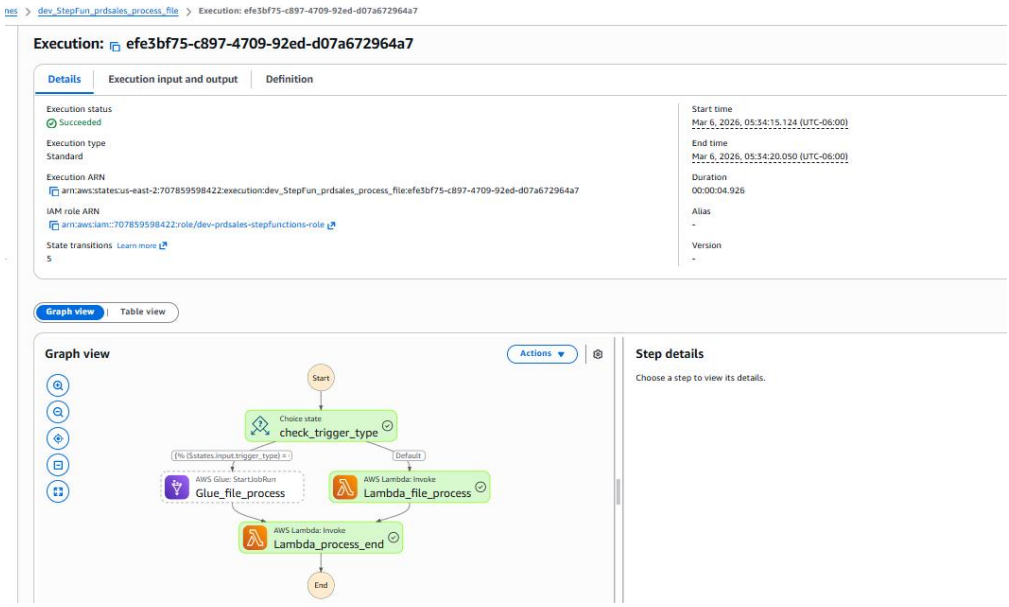




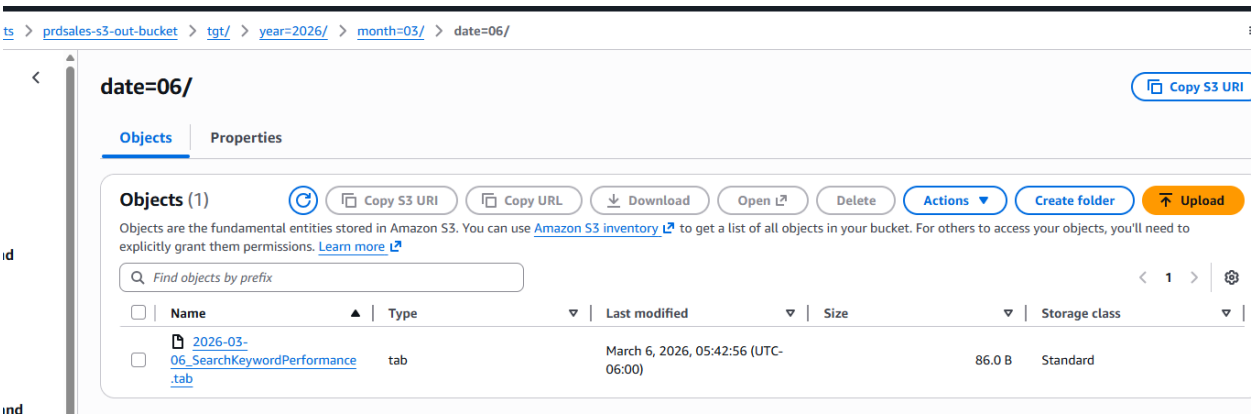
Step 6 - Step Function - For testing Glue job trigger

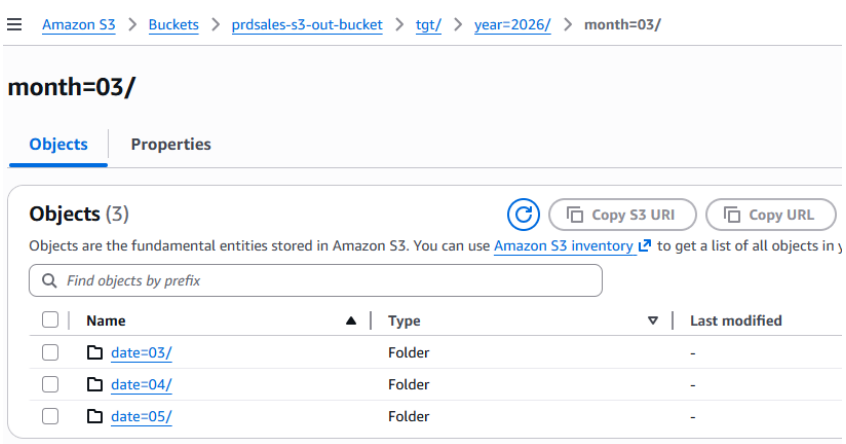


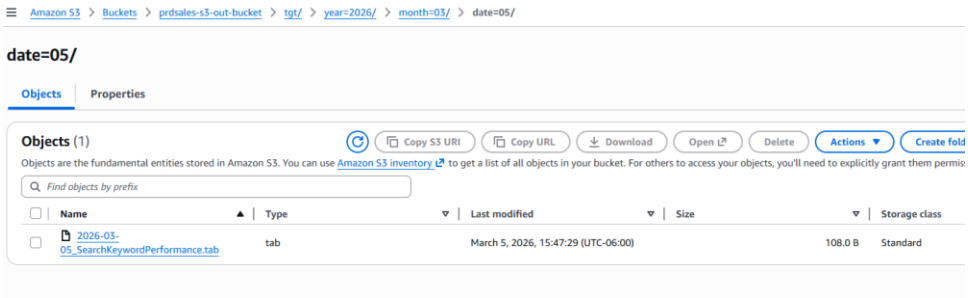
Step 7 - Step Function – For testing Lambda Trigger –



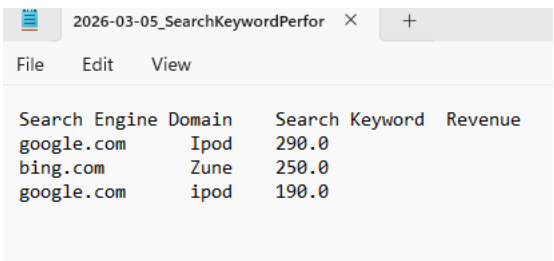
Step 8 - Creating output file in datewise folders



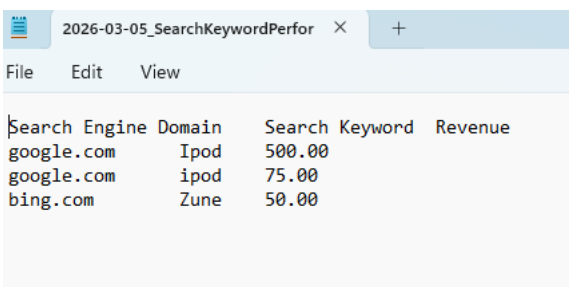




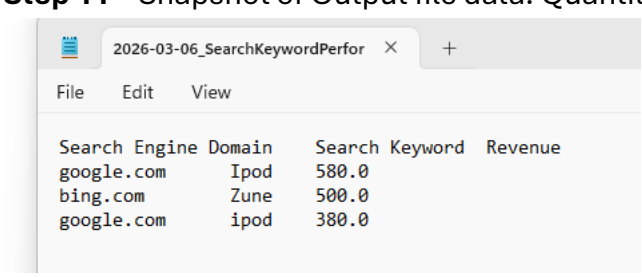
Step 9 - Snapshot of Output file data: Given Source file



Step 10 - Snapshot of Output file data: Ordering



Step 11 – Snapshot of Output file data: Quantity



Step 12 – Snapshot of case fix: Keyword
